

20th July 2021

COVID Testing and Contact Tracing

Dear Parents and Carers,

Thank you for your continued engagement in the COVID-19 testing programme. This letter gives the latest advice and guidance that we as a school have received, and aims to share our *current* understanding of the position for the September return. We will, as stated previously, write again with any updates towards the end of the summer holidays.

The asymptomatic testing programme is being paused for students in secondary schools for the duration of the summer holiday.

If you or your child wish to access rapid lateral flow testing, you can continue to do so by ordering LFD test kits from GOV.UK or by collecting kits from your local pharmacy.

We are unsure about the COVID situation we will face in the autumn, so we want to be prepared for all scenarios. Subject to public health advice, testing will restart on return in the autumn. If it does, we expect to offer your child **one** test on-site before continuing regular testing at home. The letter from the Director of Learning will provide details of the date and time that your child will start in September.

This is the most effective way to reduce the risk of transmission and support the continuation of face-to-face education. We recognise, however, the need to minimise any disruption to education and to continue to support your child's mental wellbeing. The government will continue to review the future need for testing in light of any changes to the public health situation.

The government says that you must report your child's test results, even if their result is negative or void. You should also keep a note of and share your child's results with their school/college.

Reporting results is easy. Go to [report a COVID-19 lateral flow test result](#) or call 119 free from a mobile or landline. Lines are open every day, 7am to 11pm. Support is offered in 200 languages as well as British Sign Language.

Testing twice weekly is helping us stay ahead of the virus by spotting new outbreaks quickly and plan our response. The preparations that schools and colleges are advised to take are subject to further public health advice and the latest position on prevalence of the COVID-19 virus.

Contact Tracing

As you know, the Prime Minister announced on 12 July that Step 4 of the roadmap would go ahead on 19 July.

One of the key changes that will take place as of yesterday is that education and childcare settings will no longer be asked to conduct routine contact tracing. As with positive cases in any other setting, NHS Test and Trace will work with either the positive case – or in the case of children – the parents, carers or guardian of the positive case to identify close contacts.

NHS Test and Trace already manages the contact tracing process for the rest of society – including children who have recorded a positive PCR test – and has expertise in supporting people to identify close contacts.

This letter sets out in more detail below how that process will work and what you need to do if your child tests positive for COVID-19.

Self-isolating and taking a test

1. If your child has symptoms, they and other members of the household should self-isolate – and you should inform their education or childcare setting. You should immediately order a PCR test for them. If the PCR result is negative, they and other members of their household can stop self-isolating (unless instructed to self-isolate for other reasons). If the PCR result is positive, they, other members of their household and any close contacts identified by NHS Track and Trace must self-isolate until 10 days after the onset of symptoms.
2. If your child has a positive result from a lateral flow device (LFD) test, they and other members of the household should self-isolate – and you should inform their education or childcare setting. You should immediately order a confirmatory PCR test. If the confirmatory test is taken within two days and the result is negative, they and other members of their household can stop self-isolating (unless instructed to self-isolate for other reasons). If the confirmatory PCR test is positive (or is taken more than two days after the LFD), other members of their household and any close contacts identified by NHS Track and Trace must self-isolate until 10 days after the LFD test.
3. PCR tests can be booked online through the [NHS Test & Trace website](#) or by calling 119.
4. PCR test results will be recorded with NHS Test and Trace automatically, but you should also communicate the result to the education or childcare setting during term time or summer provision.

Contact tracing

5. If your child gets a positive PCR test result, NHS Test and Trace will contact you, using the details you registered when ordering the PCR test. You and/or your child will be asked a series of specific questions designed to identify who your child has been in close contact with. Being in an education or childcare setting with someone who has tested positive for COVID-19 will not necessarily mean a person is identified as a close contact.
6. You will be asked to provide the contact details, if you know them, of any of the individuals – or their parents or guardians – who have been identified as close contacts. NHS Test and Trace will then get in touch with these close contacts and provide appropriate instructions or advice (see below).

Self-isolation and/or testing of close contacts

7. At present, anyone identified as a close contact is legally required to self-isolate and must not attend their education or childcare setting (the only exception is if they are participating in a daily contact testing trial). Anyone identified as a non-household close contact by NHS Track and Trace must self-isolate until 10 days after the date of their most recent contact with that person. If they live in the same household, they must self-isolate until 10 days after the date of that person developing symptoms (see point 1 above) or, if that person was asymptomatic, the date of their test (see point 2 above). NHS Test and Trace will notify you of the day on which the self-isolation period ends.

St Edward's School

Unity - Achievement - Faith

8. Close contacts are also advised to take a PCR test. If the test result is negative, they must still complete the full self-isolation period, as the test will not detect all positive cases. If the result is positive, they will need to self-isolate for a further 10 days – and NHS Test and Trace will contact them to identify any close contacts.
9. **From 16 August**, if the close contact is under 18, they will not have to self-isolate (in line with the policy for fully vaccinated adults) but will be asked to take an PCR test immediately, other than for very young children identified as non-household contacts, and they will not need to self-isolate while awaiting the results of the test. If the PCR test is positive, they will be required to self-isolate for 10 days from the date of the test. NHS Test and Trace will then get in touch to identify close contacts (see points 5 and 6 above). Further guidance on these changes to self-isolation will be provided shortly.

We recognise how difficult the past 18 months have been and the sacrifices that all families, education and childcare settings have had to make. This has been an enormously challenging time for everyone and we would like to take the opportunity to thank you for everything you have done.

Yours sincerely,

Mr M Antram
Headteacher
