## School Driveway Safety and Site Access

Dear Parents and Carers,

We regret that the school is unable to allow parents and carers to drop off their child on site between 8:00 and 9:00 am because of the risk of accident with large numbers of students walking up the drive at this time. We will be actively monitoring access going forward to ensure students and staff are safe.

If there is a medical or other reason why your child requires drop off or pick up, you can apply for a permit by completing a parking request form, available from Reception or from [enquiries@st-edwards.poole.sch.uk](mailto:enquiries@st-edwards.poole.sch.uk)

We appreciate that parking is not easy in the vicinity of the school, and we have increased secure cycle and skateboard capacity on site, and encourage walking or cycling to school where possible.

Please note, there are no loading /stopping zones between 8 – 10am and 2 - 4pm in Haymoor Road by the school back entrance, and in Dale Valley Road where there are zigzag lines in front of the school. The designated bus stops are also “no stopping areas” and can be identified by the broad yellow lines marked on the road.

If an area is designated “no loading”, it means cars are not allowed to stop and load or unload (goods or passengers). These zones are patrolled on occasion by council enforcement staff and any cars stopping in these zones will receive Penalty Charge Notices (parking tickets). We ask you to follow these restrictions to ensure that you do not receive parking fines.

Please help us to keep students and staff safe on campus, and ensure from January that your permit is clearly visible to staff at the gate if you have permission to access the campus for dropping off your child. Thank you in anticipation of your understanding and cooperation with this.

In the meantime, I wish all our families a healthy and happy Christmas, and a safe and happy New Year.

Yours sincerely,

Marie Lane  
School Business Manager
