

St Edward's School

Unity - Achievement - Faith

6th September 2022

GCSE Resistant Materials

Dear Parents and Carers,

As part of the course your child will be undertaking a series of practical activities during the year. These will be a combination of projects focusing on Wood, Metal and Plastic as well as focused practical tasks to support the theory side of the course.

All students are encouraged to take pride in their products and take them home on completion. This does, however, create a strain on the Department's resources and we ask for a voluntary contribution of £5.00 for the whole academic year towards the cost of raw materials. This is a voluntary contribution and therefore if you do not wish your child to bring home the finished products there is no requirement to contribute. However, without the help of voluntary contributions it would not be possible to provide the range and complexity of projects in Technology. Students eligible for Pupil Premium need not make the voluntary contribution.

Contributions should be made through the school WisePay system. If you have any questions in regards to this or any aspect of the Technology curriculum please feel free to get in touch.

Thankyou in advance for your support.

Yours sincerely,

Mrs J Morris
Subject Leader, Technology
